jos

CHARITY

Find out how our customer in the charity sector has benefitted from implementation of JOS Desktop-as-a-service (DaaS) solution.

Challenges Faced

Evolving complexity in industry coupled with limited manpower and resources. Need for cost-effective, scalable IT platform for charity organisations.

Solutions Implemented

Implemented Virtual Desktop Infrastructure environment that allows Singapore charity organisations to access the most updated and critical applications and information. Firewall and cybersecurity solutions were also in place to ensure the network and information are properly protected.

Results Achieved

Simplified licensing and reduced cost burden. Improved internal operations and control, productivity, flexibility and cybersecurity.
